

**_I was born in
the 23rd century
when humans
realised the future
of their skin was
connected to the
movement of the
body.**

_I Boost beauty.

_I am two technologies, that work together.

In the twenty-third century beauty professionals go beyond the surface of the skin. They offer total beauty, created from a perfect harmony of skin quality, muscle tone equilibrium and mental wellbeing. This is what i-Boost offers today, thanks to the combination of two technologies that work together for a dual goal: from the outside inwards with icoone to regenerate the structure of the connective tissue and re-model the body's shapes, and from the inside outwards with icoone Booster to improve posture and balance through a physiological increase of muscle tone and flexibility.

_I interconnect worlds.

In the future everything is interconnected. What we eat changes the look of our skin. Our state of mind illuminates our gaze. People exercise in museums, have beauty treatments in gyms and do gymnastics in beauty centres. i-Boost is a child of the future. And today it offers tools that anticipate change in the worlds of beauty care and wellness with technologies that interact to regenerate the skin from the outside through microstimulations and sculpt the body from the inside with elispheric movement.

_I give results you will be proud of.

i-Boost is based on a scientific approach to beauty and advanced technological skills.

It has a holistic vision of body and mind and achieves precise goals by combining an icoone skin treatment session and muscular stimulation with icoone Booster.

7 goals that can be achieved thanks to the interaction of these two technologies are:

Remodelling, Anti Cellulite, Tonification, Drainage, Posture and Flexibility, Stretching and Relaxation, and Coordination.

icoone regenerates the skin with 21,600 microstimulations a minute.

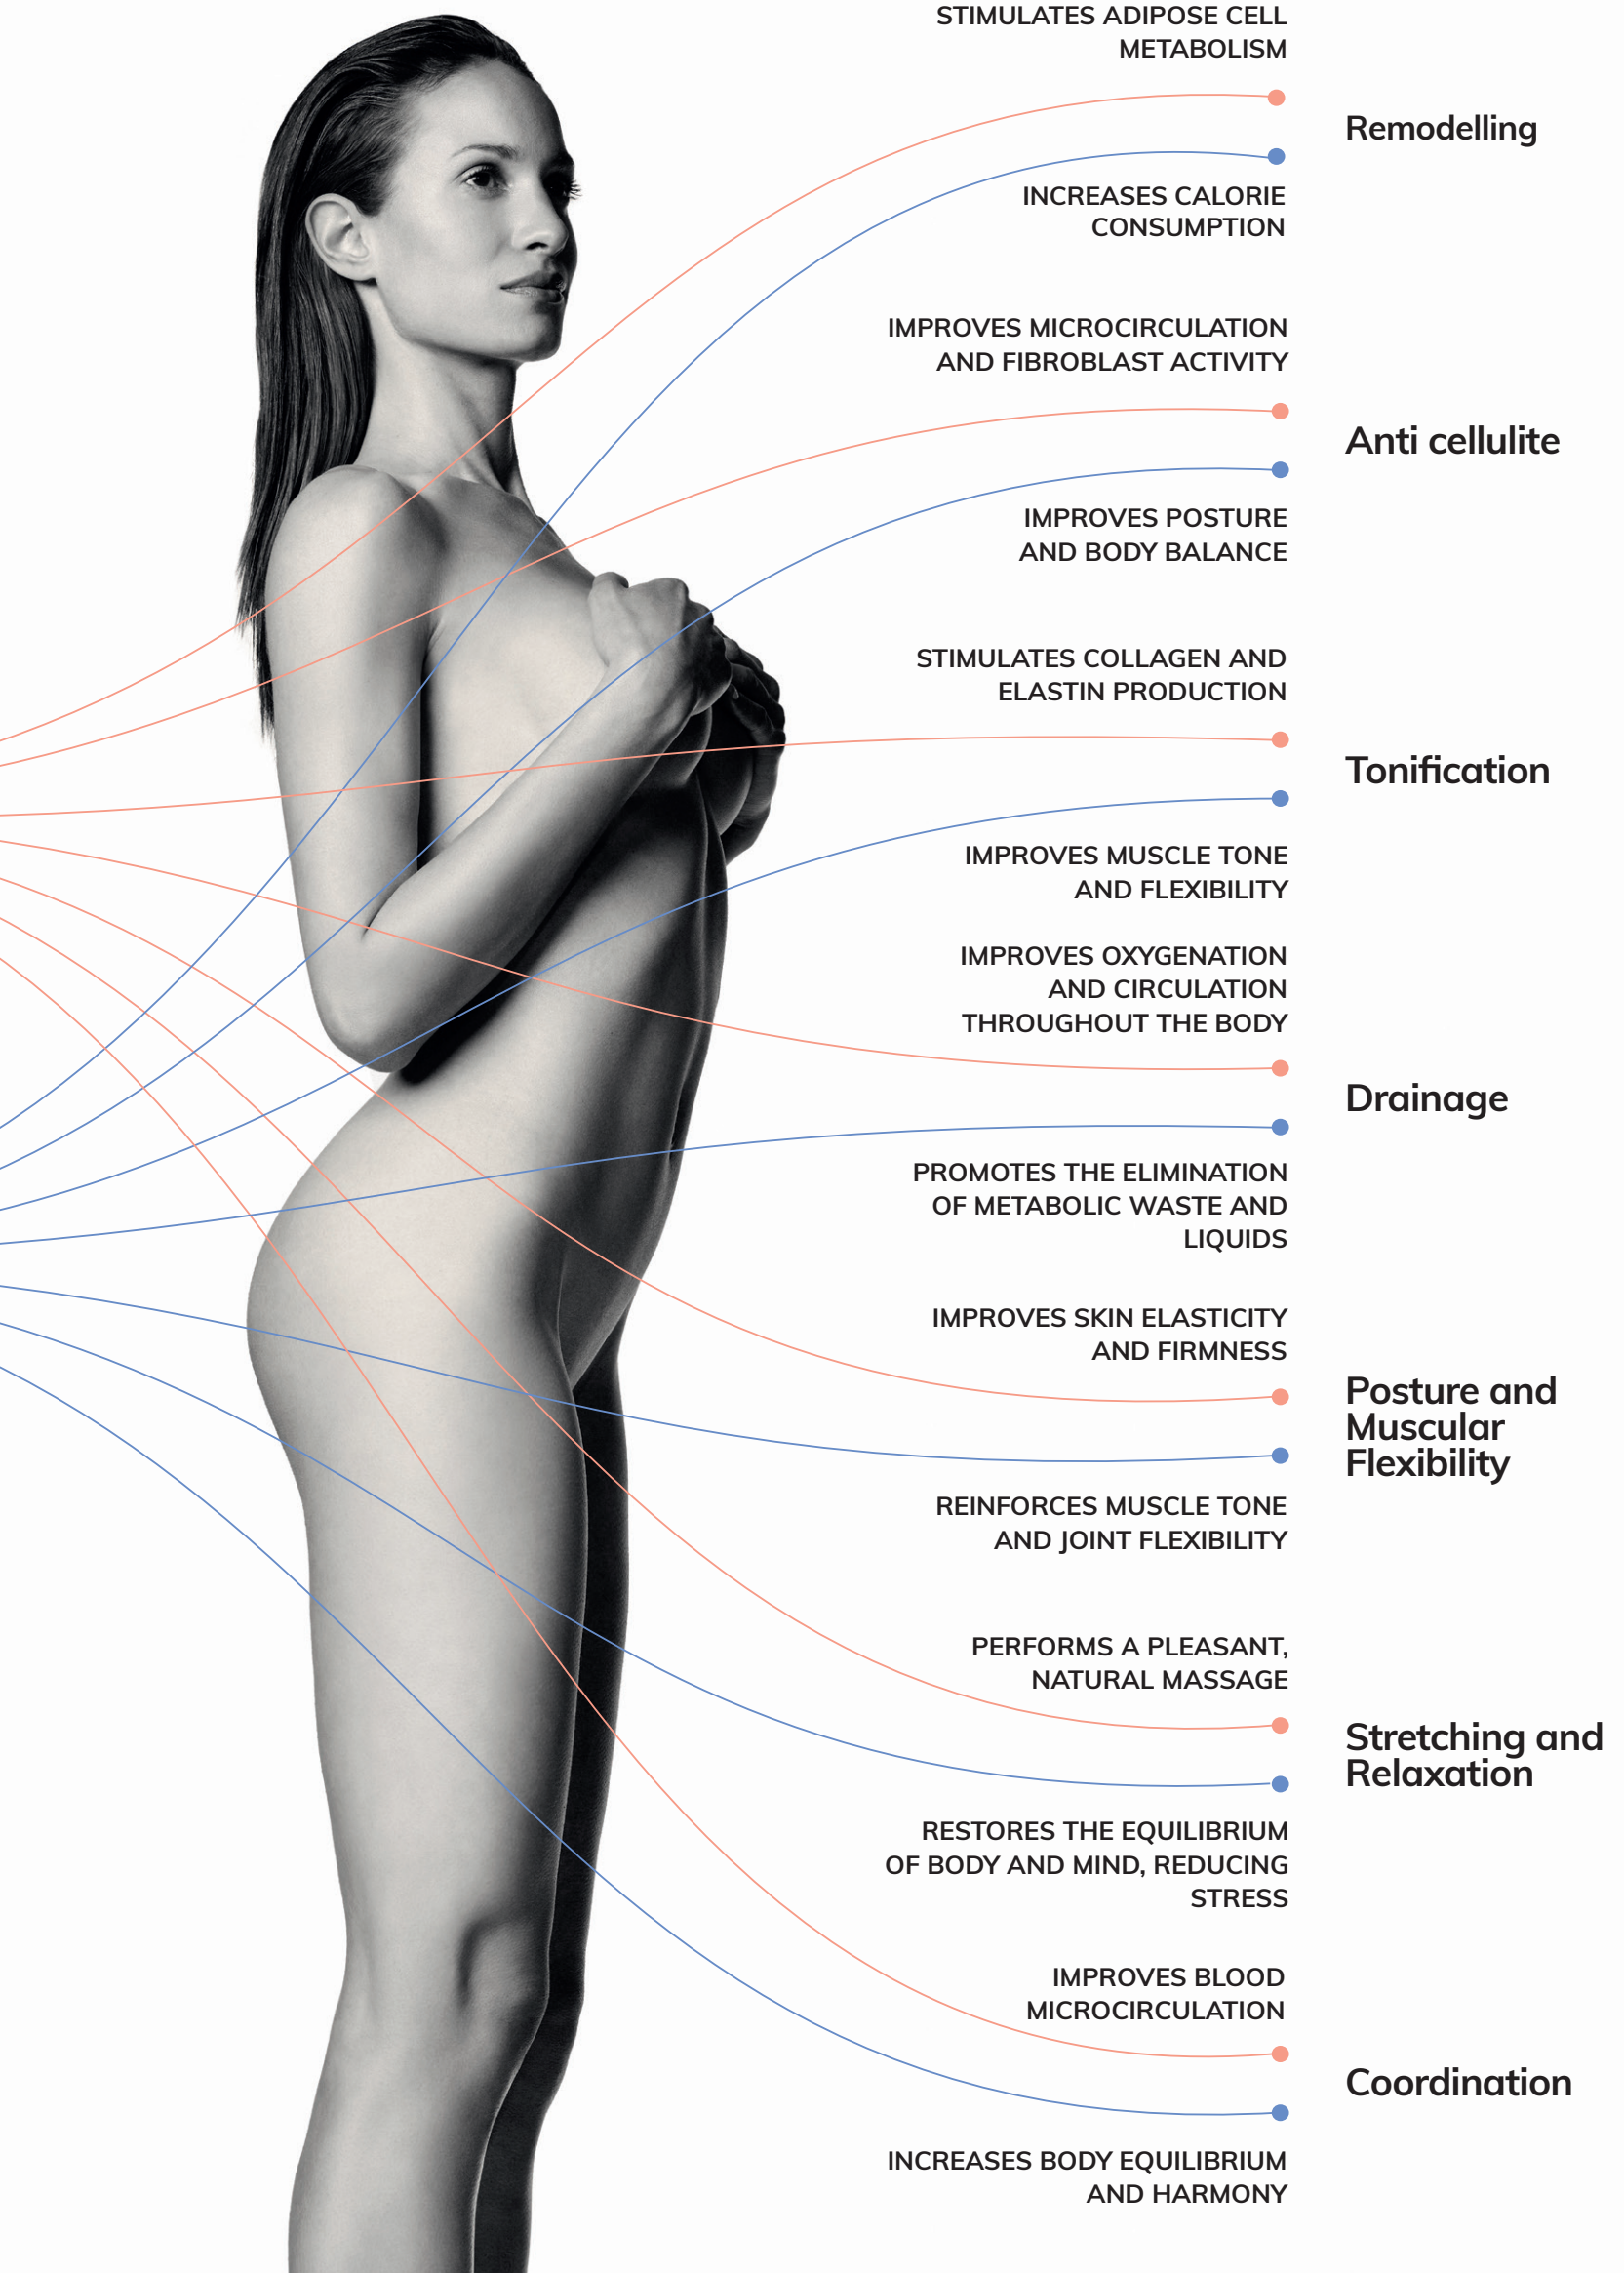

This non-invasive technology is so natural, it can be used to treat the entire body and all skin types, even the most sensitive ones, every day. It acts on the connective tissue by stimulating the tissue layers from the surface downwards, regenerating them and thereby re-sculpting the body's silhouette.

icoone Booster works 95% of the body's muscles at the same time.

The first result is a renewed, harmonious and regal posture. The second is an enhancement of icoone activities on the skin, because a correct posture reduces liquid stagnation and flaws like cellulite, by stimulating microcirculation. Artificial intelligence accompanies this process in personalised training programmes, and right from the very first session you will rediscover total well-being.

Patented Elispheric® technology
that reproduces the natural spiral movement
of muscles and joints by performing a global
action on 3 spatial axes.

_I boost beauty biz.

i-Boost is a philosophy that widens the range of action of the centre by renewing its mission, business and space thanks also to the highly distinctive furnishing design that is created for an i-Boost Zone. Here are some of the benefits for the centre that can be enjoyed immediately:

- _It increases the services offered and the centre's revenue thanks to an exclusive format and positioning.
- _It improves the results reached by customers and loyalizes them.
- _It offers express treatments thanks to intensive packages.

Sessions and packages

i-Boost offers treatment programmes that are flexible in terms of customer's needs and time availability and based specifically on the type of flaw to be treated.

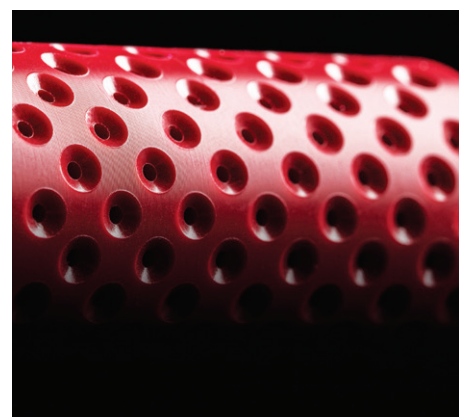

1 Express

2 Base

3 Maintenance

1 i-Boost session starts from 60 minutes and is a combination of 1 i-coone session and 2 i-coone Booster sessions.

Patented Roboderm® technology for treating skin and connective tissue thanks to microstimulations.
